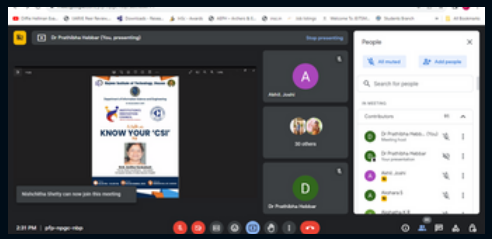
International Conference

International Conference on Advance in Computing, Control & Telecommunication Technologies-ACT 2023, organized by the Department of Computer Science & Engineering on 15-06-2023 to 16-06-2023. This prestigious event will bring together experts, researchers, and industry leaders from around the world to share insights, discuss the latest trends, and showcase cutting-edge research in the field of Computing, Control & Telecommunication. The conference will feature keynote speeches, technical sessions, panel discussions, and networking opportunities, providing an excellent platform for academic and professional growth. We invite all students, faculty, and professionals to participate and gain valuable exposure to global advancements in technology.

Webiner on Know Your CSI



Online Webinar on,

Department of Computer Science and Engineering, Rajeev Institute of Technology, Hassan has organized a talk on "Know your CSI" for the Students of Department on 06/12/2023.

The Talk started at 02.30 PM on 06/12/2023 with greetings and inviting Smt. AnithaVenkatesh, Former state Coordinator-Karntaka, Computer Society of India, Mysore Chapter by DrArjun B C, Professor and Head, Department of CSE, RIT, Hassan.

PLANTATION AND ADOPTATION OF TREE

As a part of Social Connect and Responsibility curriculum III Semester students of the department visited the "Kamadhenu Ashrama" BM Bypass Road Raja Ghatta Hassan on 30/12/2023 Saturday. The objective is to instill environmental stewardship, raise ecological awareness, and promote a sense of responsibility towards sustainable practices.

PLANTATION ATKAMADHENU ASHRAMA" BM BYPASS ROAD RAJAGHATTA HASSAN.

RAJEEV INSTITUTE OF TECHNOLOGY

Plot 1-D, Growth Center, B-M Bypass Road, Hassan, Karnataka - 573201.

June - Dec 2023

Message from the Desk

As we embark on another exciting academic term, I am pleased to highlight the various academic activities and initiatives that will shape our department's journey towards excellence. We continue to focus on providing high-quality education and fostering an environment of research and innovation. This semester, we are offering an array of opportunities to enhance both your theoretical knowledge and practical skills. Our faculty is dedicated to delivering cutting-edge courses that cover emerging areas such as Artificial Intelligence, Data Science, and Cybersecurity, ensuring that you are equipped with the latest tools and knowledge. In addition, we have organized several workshops, including a Ethical hacking Workshop and an IoT Workshop, designed to provide you with hands-on experience and real-world applications of these critical fields. Our department remains committed to fostering a holistic learning experience, encouraging participation in academic events, and promoting interdisciplinary collaboration. As always, we strive to create an inclusive and dynamic academic environment where you can not only learn but also contribute to the growth and success of the computer science community. I encourage all students to stay engaged, seek new learning opportunities, and make the most of the resources available to you this semester.

Dr. Shrishail Math
Head of Deparrtment, CSE

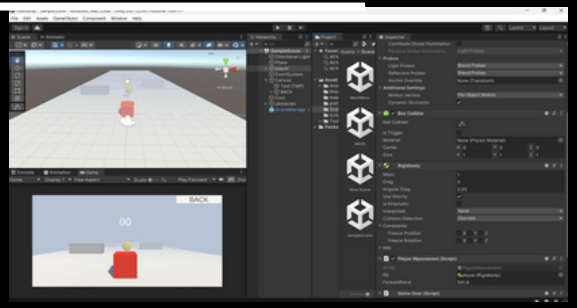
Workshop on Augmented Reality Development



Department of Computer Science and Engineering, RIT Hassan has organized 5 days workshop on ‘‘Augmented Reality and Virtual Reality’’ with association ARK Infosolutions, Bengaluru, for the students of Rajeev Institute of Technology, Hassan, from 03-10-23 to 07-10-23 . The AR-VR workshop started at 09:00 AM on 03-10-2023 with greetings and inviting the dignitaries and trainers presentedby Dr Shrishail Math, Associate professor and Head, Department of CSE, RIT, Hassan.
Augmented Reality (AR) is revolutionizing the way we interact with the world by blending digital elements with the physical environment. From enhancing gaming experiences to transforming industries like education, healthcare, and retail, AR is opening up new possibilities. Our department is excited to explore how AR is shaping the future, with hands-on sessions and workshops designed to give students exposure to this cutting-edge technology and its real-world applications.

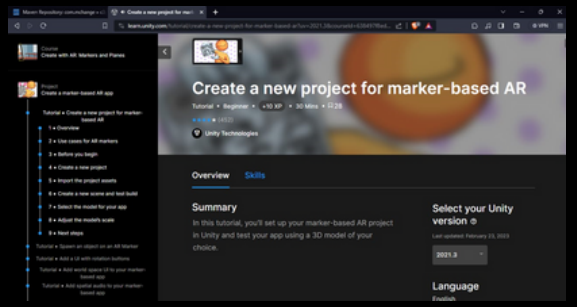
Food Walk

In an effort to promote social bonding and strengthen community ties, we recently organized a Food Walk for students and faculty on 19-12-2023 . This fun and engaging event took participants on a culinary journey, exploring local food spots while fostering new connections and friendships. It was a delightful experience that encouraged interaction, teamwork, and cultural exchange, highlighting the importance of social connectivity beyond academics. The event was a great success, bringing everyone together over delicious food and shared experiences.

Industrial Visit to Master Control Facility (MCF)

Our students from the Computer Science & Engineering department recently visited the Master Control Facility (MCF) on 07-09-2023, gaining firsthand experience of operations in a high-tech control center. The visit offered valuable insights into real-time monitoring, system integration, and the critical role of technology in managing large-scale operations. This experience enhanced their understanding of industrial automation and control systems, complementing their academic learning with practical exposure.

Internship on 2D & 3D Unity Game development



Our department recently hosted an exciting 2D & 3D Unity Game Development Workshop, where students explored the essentials of game design using Unity. Participants gained hands-on experience in creating engaging 2D and 3D games, learning key skills like programming, asset creation, and game physics. This workshop provided a platform for students to unleash their creativity and develop practical skills in the growing field of game development, equipping them with the knowledge to build their own interactive experiences.
