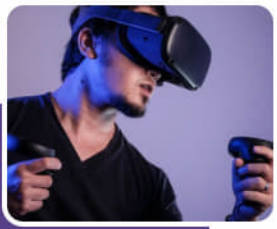
OUR CENTRE OF EXCELLENCE

At **RIT**, our relentless goal is to achieve global recognition for our comprehensive engineering education. We strive for a progressive environment that fosters creativity and learning. We aim to create a research and entrepreneurial ecosystem without limits. We are dedicated in making a positive impact on society through sustainable practices. To achieve this, we have set up various Centre of Excellence to ensure excellence in all areas. Our ultimate aim is to shape our students into conscientious and versatile individuals who will drive significant change in the world.



Virtual and Augmented Reality

Virtual and Augmented Reality (VR/AR) are immersive technologies that simulate real-world environments or enhance them with digital elements.

Internet of Things (IoT)

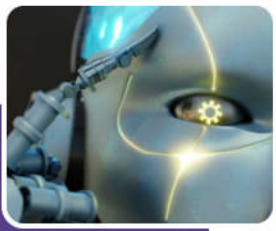
Internet of Things (IoT) is a network of physical devices, vehicles, and other objects embedded with sensors and software for data exchange.

Blockchain Technology

Blockchain technology is a decentralized, secure, and transparent ledger system that enables peer-to-peer transactions without intermediaries.

3D Printing & Manufacturing

An introduction to 3D printing and additive manufacturing processes, materials and benefits.



Artificial Intelligence (AI)

Artificial Intelligence (AI) is the simulation of human intelligence in machines that can learn, reason, and solve problems.
